DRY CLIMATE RUINS MANY GOOD PIANOS

MANY GOOD PIANOS.

Only a few of the 550 American makes will withstand Southwestern conditions.

Of the 550 different planos manufactured in America-mest of them excellent instruments when they leave the factories—which of them can be depended upon to give permanent satisfaction in this dry climate?

This is the most important question which confronts plano buyers in and about El 'aso; and it can be solved satisfactorily in just one way—by buying of the house which can hack its every statement concerning planos with 151-2 years of actual test. This house is the El Paso, and for use in a dry climate it unhesitalingly recommends the following instruments: Steinway, Everett, Pischer, Harvard, Stroud and Weben. 208 (south side) Texas St., W.
